GEAR Acrobatic Shock Cords
Dynamic stretch as shown
56" (142 cm). Stretch is 2x static
length or 100%. To ensure a longer
service life, a maximum of 100%
stretch is recommended. If tension
appears less than desired, additional
cords may be necessary. If tension
appears more than desired, removal
of cords may be necessary.

Stretch distance can be adjusted by
positioning cords up or down on
Daisy Chain.
